cargo handling specialists

www.cargohs.co.za

*Back in 1995 **Cape Crating** set out to provide crating services to the freight forwarders. Twenty-one years later we have evolved into a company providing an extensive range of specialised services. As part of this evolution we are changing our name to more accurately highlight the range of services we offer and reflect where we fit into the market.*

From April we will be trading as Cargo Handling Specialists. Still providing the same expert advice and service – just with renewed focus and a new look as part of our strategy to continue to grow and improve.

Owen Bottomley
MANAGING DIRECTOR

Cargo Handling Specialists is the only INPRO* member in Africa.

Transport division

We provide local transport solutions including container haulage, dedicated vehicle transport and abnormal loads.

Container division

We offer container-loading services at both our premises and on site. This can include depot transport, container Gross Mass Verification and forklift hire. Other services include fumigation, container sales and staging. We are specialists in load, lash and the securing of flat racks and provide an in-house lashing report.

We also offer container hire, including DNV units to the Oil & Gas industry.

Hazardous division

Our trained staff is able to prepare your hazardous cargo packaging and documentation in accordance with IATA and IMDG standards.

Stevedoring division

Cargo Handling Specialists is a licensed Stevedoring Company that is authorised to work in the port of Cape Town. We are specialists in project cargo and OPL work.

Rigging division

Our staff are trained and equipped to take care of your rigging projects anywhere. We also have a dedicated 32tm crane truck for this work.

Crating & Packaging

Our expertise ensures your export packaging is not only effective for safe transit and multiple handling but also from a cost point of view. Our timber complies with the ISPM-15 treatment requirements. Cargo Handling Specialists also offer various packaging materials in-house, ranging from bubble wrap, barrier foil and vapour corrosion plastic to protect your moisture sensitive cargo.

Warehouse & Storage

Safe and secure warehousing is offered with an installed CCTV system, alarm, regular pest control treatment and vehicle storage.

Projects division

We offer turnkey project solutions that often involve all our services, from rigging to packing, container loading and transport. With all the in-house resources available to us, we are able to provide customers both peace of mind and a great service.

Cargo Handling Specialists offers export-packing solutions to ensure your cargo travels safely.
